WORK EXPERIENCE

Data Engineer | The Cigna Group | Morris Plains, NJ July 2025 – Present

- Partnered with governance and engineering stakeholders to define requirements for integrating healthcare ontology data into governed analytics assets
- Standardized healthcare ontology data in Databricks by integrating the PoolParty API and transforming complex JSON exports
- Managed 30 production AWS MWAA Airflow DAGs and built 2 Python pipelines supporting weekly claims-data processing
- Improved workflow resilience by implementing stakeholder alerts and restart-from-step recovery for production pipelines
- Orchestrated 100K+ weekly claims across 30+ source files into Databricks tables, ensuring timely data availability for reporting and analysis

Product Manager | APM Season (recently acquired by joinleland.com) | New York City, NY March 2025 – May 2025

- Led the 0 to 1 development and launch of a consulting-focused job board on a platform with 30,000+ monthly active users
- Conducted user research, SWOT, and market analysis to narrow 15 feature ideas into 1 validated product opportunity
- Authored PRD and coordinated engineers and marketers to deliver product and launch go-to-market strategy
- Drove 1,000+ launch visitors (60% above target) and generated \$500 revenue in first month

Data Engineer Intern | Elevance Health | Atlanta, GA May 2024 – August 2024

- Built AI-driven claims automation pipeline, modernizing adjudication workflows and improving customer satisfaction
- Analyzed 30 years of claims data, mapped end-to-end workflows to identify automation and error-reduction opportunities
- Implemented Llama 3 RAG pipeline standardizing free-text claims into JSON, reducing false denials by 50%
- Partnered with claims, engineering, compliance leaders to drive adoption balancing efficiency and regulatory requirements

Lead Product Manager | ProductGT / Microsoft | Atlanta, GA September 2023 – December 2023

- Launched Excel VBA automation tool streamlining product pricing workflows and eliminating manual processing
- Translated stakeholder interviews into product roadmap and iterative prototypes aligned with business requirements
- Led developers through testing with real pricing data, incorporating feedback to improve automation accuracy
- Reduced manual pricing effort by 70%, increasing speed, accuracy, and cross-team productivity

PROJECTS AND RESEARCH

Founder and Program Manager | Pickled Pink Breast Health Initiative April 2024 – Present

- Analyzed event registration and fundraising data to optimize participant engagement and event strategy
- Coordinated cross-functional stakeholders, including 20+ volunteers, hospital staff, and community sponsors
- Measured event KPIs that drove \$200K in fundraising across two annual tournaments
- Improved event operations through a scalable framework, achieving 100% sponsor retention and positive patient outcomes

Machine Learning Researcher | AMIR Group and Freeman Lab August 2023 – December 2024

- Identified accuracy gaps in existing avian recognition models through literature review across underrepresented regions
- Designed and trained neural network using region-specific audio data to classify bird species
- Improved model accuracy to 90% through iterative testing and algorithm optimization, advancing bioacoustics research

EDUCATION

Georgia Institute of Technology | Atlanta, GA GPA: 3.91

Master of Science in Bioinformatics

Villanova University | Villanova, PA GPA: 3.65

Bachelor of Science in Comprehensive Science

SKILLS

Programming & Data: Python, SQL, Bash, KQL, API Integration, Data Modeling, Data Governance

Analytics & Reporting: Power BI, Excel, Tableau, Streamlit, Data Analysis, Dashboard Development, Reporting Automation

Cloud & Enterprise Platforms: AWS, Azure, Databricks, Airflow, Snowflake, BigQuery, Teradata, Google Cloud

Process Improvement & Automation: Workflow Automation, CI/CD, Git, JIRA, Process Optimization, AI-Assisted Development

Collaboration & Process Improvement: Git, JIRA, CI/CD, Requirements Gathering, Stakeholder Communication
